How to coronavirus-proof your home

By Scottie Andrew, CNN

Life under coronavirus means staying at home as much as possible — but you’ll likely need to make a trip to the grocery store or pharmacy at some point. Download or print this tip sheet to make sure you don’t bring the virus back home with you.

Note: Recommendations for Covid-19 may change as officials learn more, so monitor your local health department and the Centers for Disease Control and Prevention for updates.

🛒 Make a game plan

- Designate one person to be your errand-runner to limit your outside exposures
- Set up a disinfecting station — an area outside your home or in a room with low foot traffic where you can disinfect packaged food

гер When you’re out

- Avoid coming within less than six feet of others
- Wipe handles on carts or baskets while shopping
- You don’t have to have gloves or a mask — just wash your hands frequently while you’re out and avoid touching your face

🔍 When you get back

- Wash your hands with soap and water for 20 seconds
• Disinfect takeout boxes and packaged foods at your disinfecting station
• Thoroughly wash produce before putting it in your kitchen

🔗 Disinfect

• Disinfect everything you touch — doorknobs, light switches, keys, phone, keyboards, remotes, etc.
• Use [EPA-approved disinfectants](https://www.epa.gov/) (these include Clorox Disinfecting Wipes and certain Lysol sprays) and leave surfaces wet for 3-5 minutes

📦 Delivery

• Ask workers to drop deliveries off on your doorstep or an area of your complex
• If they need you to come to the door, keep six feet of distance
• Pay and tip online when possible
• After you pick up mail from your mailbox, wash your hands

👕 Laundry

• Wash clothes, towels and linens regularly on the warmest setting
• Disinfect your laundry hamper, too, or place a removable liner inside it
• Don’t shake dirty laundry to avoid dispersing the virus in the air

暄 Guests

• You shouldn’t allow guests over right now
• If you need to house a family member or friend, avoid shared living spaces as much as you can
• If they need to enter shared living spaces, ask them to keep six feet of distance
If someone in your home gets sick

- First, consult your doctor
- Isolate them in another room and ask them to use a separate restroom
- Disinfect frequently touched surfaces every day
- Avoid sharing items with them
- Wear gloves when washing their laundry
- Continue to wash your hands frequently
- Ask them to wear a face mask if they have one

Supplies you’ll need

- EPA-approved disinfectants
- If you don’t have disinfectants, make a bleach solution:
  - Mix four teaspoons bleach per quart of water; or
  - Use a 70% alcohol solution
- Laundry detergent
- Trash bags
- Prescription medicines (you can mail order these)
- Canned foods — fruits, veggies, beans
- Dry goods — breads, pastas, nut butters
- Frozen foods — meats, veggies, fruits

Pets

- Supervise your pet in your backyard
- It’s OK to play with them outside — just keep your distance from other humans
• If you’re sick, ask someone you live with to take care of them while you recover
• If you must care for them while you’re sick, wash your hands frequently
